

Letter of Med Nec for Pulse Oximeter

Date:

RE:

DOB:

To whom it may concern;

(patient) is a (age) (sex) that has a diagnosis of but not limited to (diagnosis). In order to assure that (patient) maintains adequate airway and out of respiratory distress due to his/her complex medical condition, it is recommended that he/she receives a Pulse Oximeter. The Pulse Oximeter will provide the caregiver ability to assess or to be notified if Respiratory issues are occurring and to respond appropriately in order to keep in a healthy state.

Sincerely,
